Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: .for the particular neighborhood in which the work was offered. No problem was admitted simply because it might meet the needs of some technical artisan or college entrance requirements, but simple problems in sidewalk construction, making of road drags, cutting of handkerchief squares, and so on. The problems were short and definite. Problem material was easily found in mechanical drawing, in elementary physics, in construction of buildings, graphs, and machinery in motion. The motor belt easily shows the common tangents, either internal or external. Graphical representation of statistics, location problems, common forms of symmetry with simple objects as the capital Latin letters, problems in crystallography, as the hexagonal snowflake, botany with the radial arrangement, optics with the equal angles of incidence and reflection, or the angles of refraction, surveying, and common problems of domestic science, furnish a suggestion as to the source of the problem material. In addition, problems were found in carpentry, manual training, laboratory, masonry, blacksmithing, transportation, newspaper offices, and the other activities of the town. We had to make the problems short, simple, and definite, because the average high school pupil is not willing to spend several hours upon a problem that is long, indefinite or tedious in detail. He is not sufficiently developed to analyze a problem that is indefinite or meager in hypothesis. All problems that presented themselves were not adapted to our particular high school, as some were too complex, some too indefinite and some called for material that was...
