Excerpt: . the efficacy of mineral waters and alkalies in dissolving gall-stones is inconclusive and must remain so, there can be little doubt that they improve the general health, lessen the tendency to acid dyspepsia and gout, reduce congestion of the liver, and produce such changes in the bile as lessen the chances of the formation of fresh concretions. In dogs, for instance, with biliary fistulze, the mere drinking of large quantities of water will increase the amount of water in the bile, and there is evidence that the quantity of soda in the bile may also be increased by taking it into the stomach. From See also Dr. Barclay, Brit. Med. Journ. Jan. 15, 1870, Salicylate of soda, even in very small doses, seems to have a very remarkable effect in rendering the bile more watery and fluid, as well as in increasing the quantity...
